SUMMARY

Motivated Electronics and Communication Engineering student with a strong foundation in Python and Java, along with hands-on experience through Soldering-based workshop and projects using Arduino, and advancing in problem-solving. Passionate about IoT, Embedded systems and software-oriented roles, with a keen interest to apply theoretical concepts in the real-world systems.

EDUCATION

Bachelor Of Engineering in Electronics and Communication Engineering - 8.85 (till 3rd semester) Jun 2024 - May2028
Sona College of Technology

HSC - 77.5% Jun 2023 - May2024

Notre Dame of Holy Cross School, CBSE

SSLC - 84.67 % Jun 2021 - May2022

Notre Dame of Holy Cross School, CBSE

ACADEMIC PROJECTS

AI-powered solution for wildfire detection and prediction

- Participated in the development of an AI-powered solution for wildfire detection, prediction as a Software team member of Team Data Drifters.
- Implemented AI, satellite imagery, and predictive modeling to detect wildfires at an early stage, forecasted their path in real time.
- Worked with TensorFlow, PyTorch and R-CNN with Scikit-learn to develop AI models. Fire spread was predicted using Cellular Automata and Monte Carlo simulations.
- Contributed to supports global climate goals by enabling faster, smarter responses to disasters.

Environmental and motion monitoring module for cubesat

- Designed a system that integrates a DHT11 sensor for temperature and humidity measurement using ADXL345 accelerometer, SD card module.
- The Arduino Uno served as the control unit, managing sensor interfacing via I2C and SPI protocols. LED indicators were implemented to visualize the system's operational state.
- Contributed to simulates a low-cost CubeSat module capable of collecting and storing critical environmental and motion data during flight or testing conditions.

SKILLS

Soft Skills

- Strong leadership qualities.
- Effective time management.
- Quick and adaptive learner.
- Collaborative and teamwork ability
- Committed to strong work ethics.

Technical

- **Programming Languages:** Python, Java
- **Technologie:** SQL
- **Tools & Software:** Canva, MATLAB, MS - Excel, TinkerCad, Arduino IDE, VS code

CERTIFICATION COURSES

- Basics of Python
- Basics of Java
- Introduction to C programming
- Deep Learning Onramp (MATLab)
- Image Processing Onramp (MATLab)
- Introduction to IoT

ACHIEVEMENTS

- Participated and completed Techathon'25 conducted by Sona College of Technology
- Participated and completed an Ideathon event- TechSHEvate
- Participated in SIH-2025
